Definition of Terms

SaF (STORE & FORWARD): Normally used during connectivity issues or when experiencing no wireless services.

Warning: When using the Store & Forward function, a valid authorization is not received from the issuer until the transaction is submitted for settlement!

V-CODE: Typically a 3 digit number found on the back of the credit card.

ZIP CODE: Customer's billing zip code.

STREET ADDRESS: Customer's billing address.

Example:

Joe Cardholder
321 Main St
Anytown, USA 12345

Street Address is **321**, zip code is **12345**

APPROVAL CODE: Authorization code for a specific amount. Typically, 6 digits, but can contain letters.

BATCH ID: Current days batch ID. Found on each receipt or on report

TRANS ID: Transaction ID. Found on each receipt or on report

TRANS SEQ: Transaction Sequence. Found on each receipt or on report.

PIN: Customer's Personal Identification Number, required for each Debit transaction

CNP: Card Not Present interchange, requiring Invoice and AVS
